Features

Your Harmony**Duo** features the following:

Features	Benefits
Unique two way tap	Dual function: fountain and/or waterfall
Variable height telescopic pole	Lifts fountain head to suit the depth of your pond
Variable water flow	Adjusts pump to your water feature
Quiet operation	Nothing disturbs the tranquillity
Spongeless design	No site for bacterial growth
Double Grid Filter System	Minimises maintenance requirements
Vortex impeller	Energy efficient Passes some small solid materials minimising maintenance
DCS ceramic bearing system	Dramatically reduces wear, making Harmony Duo virtually maintenance free

HarmonyDuo

Tranquillity

Nothing relaxes like the sound of running water. Onga HarmonyDuo lets you create an environment of serene relaxation.

Onga HarmonyDuo is a user friendly pump that sets a new standard in versatility, reliability, and performance, wrapped up in a stylish new design.

Adaptability

Onga Harmony**Duo** includes as standard all those features needed to adapt itself to your design.

- Each pump is supplied with a variety of fountain heads to provide many options for the design of your water feature.
- The unique two way tap
 - adjusts the height of the fountain
 - diverts water to the top of a waterfall or other water feature using running water.
- Suitable for ponds built using both flexible membrane liners or rigid pre-formed plastic moulded liners
- Suitable for use with biological or pressure filters, to keep your pond water crystal clear.

Wide Range

The Harmony**Duo** range includes six models which will pump volumes of water from less than 500 litres per hour, all the way up to 5000 litres per hour.

There is an Onga Harmony**Duo** model which is perfect for your water feature.

The other side of this brochure has some selection information. Your Onga dealer can help you with further advice.
