

## Deep Sockets

The opportunity for socket withdrawal relies on a number of factors, chamfer length, squareness cut of pipe end, contraction due to temperature differential, poisson contraction of pipe when pressurised and how well the pipeline is constructed. There is much debate in the industry as to the appropriate value of each of these parameters, so the best way to insure against withdrawal is to use the biggest entry fittings available.

The Vinidex SUPERLINK™ range has the deepest socket entry available in Australia, they are suitable for all pipe materials in all classes, Supermain PVC-O, PVC-M, modified PVC, PVC or ductile iron.

## Peace of Mind

Sophisticated plastic pipe systems require sophisticated fittings. The new SUPERLINK™ range of Ductile Iron fittings are deep socketed, nylon coated and corrosion resistant to suit all pipelines.

- One Stock
- Deep Sockets
- Nylon Coated
- Corrosion Resistant
- Australian StandardsMark to AS/NZS 2280
- WSAA Appraisal
- Series 1 & 2 Adaptable
- Potable Water safe to AS/NZS 4020
- Vinidex Quality and Reputation

## Product Range

Vinidex stock their SUPERLINK™ fittings in sizes from 100mm - 200mm. For further information on the SUPERLINK™ range please contact your nearest customer service centre on 13 11 69.
